

KHALED ELSHIMY

Engineering Manager

Mobile, Web & XR Engineering | Agile/XP Team Leadership & Product Delivery

khaled.m.elshimy@gmail.com | +20 100 182 6485 | linkedin.com/in/khaledelshimy | khaledelshimy.com

PROFILE

Hands-on engineering manager with 13+ years in software and 7+ years building and leading cross-functional, self-organized teams of up to 10+ engineers across mobile, web, backend, and XR. Currently leads engineering at Shababeek Labs, an Abu Dhabi XR studio shipping enterprise and education training simulations and a commercial VR title on Steam. Strong product sense: picks the opportunities that matter to customers, and balances continuous discovery (playtests, user feedback, experiments) with predictable delivery. Grounded in lean/agile and Extreme Programming practices (TDD, pair programming, simple design, continuous refactoring), trunk-based development, and continuous delivery. Communicates clearly in writing and in person to keep stakeholders engaged and dependencies moving. Curious and open-minded, and actively seeks feedback.

CORE STRENGTHS

Leadership & people: Building and leading empowered, multidisciplinary teams; hiring and onboarding; mentoring and coaching; 1:1s and career growth; continuous feedback.

Product & delivery: Product discovery and prioritization by customer impact, lean/agile and Scrum, roadmap and release planning, stakeholder and dependency management, written narratives and proposals.

Engineering practices: XP (TDD, pair programming, simple design, refactoring), trunk-based development, CI/CD and continuous delivery, code review, automated end-to-end testing.

Architecture & cloud: Distributed systems, microservices, event-driven architecture, RESTful APIs; designing, monitoring, and scaling web apps and APIs; AWS, Google Cloud, Kubernetes; monitoring, alerting, performance, and security standards.

Mobile & tech: Full mobile lifecycle from architecture to store release; native Android/iOS (Kotlin/Java, Swift/Objective-C), mobile SDKs, Unity, Unreal, C#, C++, Node.js, Next.js, React Native, BLE, real-time multiplayer (Photon, SmartFox, WebRTC).

PROFESSIONAL EXPERIENCE

Shababeek Labs FZ LLC | Engineering Manager

Feb 2024 – Present

Abu Dhabi, UAE · XR studio: enterprise training, EdTech, and VR games

- Built and lead a cross-functional, self-organized team of 6+ engineers, designers, and artists, owning technical direction, planning, and delivery; shipped 4+ projects across enterprise training, education, and games.
- Run continuous product discovery alongside delivery: public playtests at industry events and client feedback sessions feed a prioritized backlog, so the team works on what moves the needle for users.
- Manage engineering delivery of *Good Morning, {Employee Name}*, the studio's self-published VR narrative game on Steam: scope, milestones, multi-headset builds (PC VR, Meta Quest), and the Steam Next Fest demo ahead of a Q4 2026 launch.
- Led VR training simulations, including a port crane operator training demo and university client work, from requirements through release and handover to client teams.
- Introduced XP practices (TDD, pair programming, continuous refactoring), trunk-based development, and CI/CD with automated tests, shortening the path from commit to playable build.
- Hired and onboarded 3+ team members; mentor and coach engineers through 1:1s, pairing, and regular feedback; write proposals and technical narratives for enterprise and government stakeholders and manage third-party dependencies.

Audiomob | Senior SDK Engineer

Jul 2022 – Dec 2023

- Built an audio advertising SDK and its Android/iOS libraries in Java, Kotlin, Swift, and Objective-C.
- Built automated end-to-end and integration tests into the CI/CD pipeline, and applied security and privacy standards for an SDK running inside third-party apps.
- Wrote API documentation and supported partner developers through integration, turning recurring issues into SDK and docs improvements.

Double Jump | Lead Software Engineer

Mar 2022 – Nov 2022

- Led a team of 4+ engineers on a multiplayer title: planned and assigned work, reviewed code, and mentored junior developers through implementation.
- Designed event-driven backend microservices and RESTful APIs for multiplayer logic and real-time chat, deployed and scaled on Google Cloud with Kubernetes, with monitoring and alerting in place.
- Delivered wallet integration and Solana NFT minting.

Avrioc Technologies (MyWhoosh) | Lead Software Tools Engineer

Dec 2020 – Jul 2022

- Led a team of 10+ engineers on the tools behind MyWhoosh's smart-trainer connectivity: planned and assigned tasks, reviewed code, and coordinated releases with the wider app team.
- Built BLE plugins connecting smart bikes and trainers to MyWhoosh and exposing their data inside the app.
- Worked on trainer-data displays, UI, and interactive features, shipping releases across Windows, iOS, and Android.

LanaGames | Lead Software Engineer

Nov 2019 – Dec 2020

- Managed a team of 4+ developers on soccer simulations and app flows: planned and assigned work, ran standups, and owned production timelines.
- Oversaw the Stadia port of *Destroy All Humans!*, leading performance optimization and shader fixes.

Zinad | Lead Software Engineer

Jul 2017 – Nov 2019

- Led a cross-disciplinary team of 4+ building AR/VR and WebGL security-awareness applications.
- Owned project planning, task assignment, QA, and client communication; built interactive video, quiz, and scoring features.

El3ab.com | Senior Software Engineer

Jul 2015 – Jul 2017

- Built client and server features for multiplayer card games, including Estimation Kings, with Java and SmartFox Server; supported live operations and junior developers.

Bookmark-Corp | Software Engineer

Jul 2012 – Sep 2014

- Built UI, physics, character behavior, and quizzes for educational applications.

SELECTED PRODUCT WORK

TyrAds Rewards SDK | SDK Engineer, Consultant (Nov 2024 – Present). Hands-on side role building the C# rewards and offerwall SDK for Android and iOS, with native plugins, telemetry, and monitoring. Keeps technical judgment current on production mobile SDKs.

ActionNote | Founder, product & engineering. Voice-note mobile app that turns recordings into summaries, key points, and tasks. Owns product discovery, roadmap, and implementation across mobile app, web, and cloud APIs.

Tamatem Connect Plus | SDK integration. Improved the SDK to make integration easier for game developers.

EDUCATION

BSc in Computer Science | Minia University, Egypt

Game Development Diploma | Information Technology Institute (ITI), Egypt
